

Assignment 2 - HTML/CSS Intro, Fonts and Layout

Due Wednesday, February 7 at 11:59PM

1. Create a new branch in Git called 'html-css-intro'
2. Create an index.html file using the HTML template provided in class and on Blackboard
3. Create a styles.css file and a reset.css file that contains the reset styles from Eric Meyer (<https://meyerweb.com/eric/tools/css/reset/>)
4. Include links to both style sheets in the head of your html file and be sure they are in the right order for cascading purposes
5. Create a webpage that looks like the example page provided.
 - a. You do not need to match colors, sizes, font, text etc. Focus on getting the layout as similar as possible.
 - b. Make use of the semantic tags discussed in class (ex: header, footer, section, nav, etc.).
 - c. Include at least one downloaded Google font with all 4 font file types and be sure it is used for all text on your page.
